

Release Notes (What's New) For
V 3.3
October, 2006 - Registry Products
FINAL

MODULE NAME	HD#	DESCRIPTION
Iweb Core		<p>Patient Search/Add - Advanced Search</p> <p>Corrected the JavaScript validation prompts that previously took the user to a blank screen.</p>
Iweb Core		<p>Vaccination Detail Add</p> <p>Corrected the problem of duplicate vaccines appearing when an error was encountered on the Add Administered – Vaccination Detail Add screen.</p>
Iweb Core		<p>Administration - Inactivate Physicians/Vaccinators</p> <p>Added a new feature which will give you the ability to inactivate all Physicians/Vaccinator entries associated with a user when a particular user is inactivated.</p> <p>This feature is visible on the Web User edit screen. If you check the inactivate box, a new row will display asking if you also want to inactivate any Physician/Vaccinator records.</p>
Iweb Core		<p>Administration - IRMS VIS Date Defaults</p> <p>Enhanced the state level VIS default settings which will allow the user to add an IRMS to an existing set of VIS dates as well as filter a change to a VIS default to all other IRMSs. This will eliminate unnecessary data entry when VIS statements change and when new IRMSs are added to the system.</p>
Iweb Core		<p>Management Reports – Coverage by Vaccine</p> <p>Corrected the Coverage by Vaccine report schedule to fit onto one screen.</p>
Iweb Core		<p>Reports Module – Daily Status Report</p> <p>Corrected the report so the text aligns on the Daily Status report.</p>
Iweb Core		<p>Exports Menu – Claim Status</p> <p>Added a message to the display to indicate Claim ID unknown or patient record not found when the VIEW button is clicked.</p>

Release Notes (What's New) For
V 3.3
October, 2006 - Registry Products
FINAL

MODULE NAME	HD#	DESCRIPTION
Iweb Core		<p>Favorites Menu</p> <p>A message now appears stating Changes have been made successfully on the Add/Edit Favorites window when the Save button is pressed.</p>
Iweb Core		<p>Administration – Data ID Mapping</p> <p>Corrected all the buttons to display correctly and also corrected the colors for the Facility and Physician Mapping titles.</p>
Iweb Core		<p>Administration – Master Deduplication by External Source</p> <p>Corrected the Back button to display correctly.</p>
Iweb Core		<p>Administration – DTT Properties</p> <p>Changed the field label on the DTT properties screen to better define what the feature does. It was changed from Make non-owning IRMS records historical to Do not change current patient ownership or public data for non-owning IRMSs.</p>
Iweb Core		<p>Administration – IRMS Maintenance</p> <p>The IRMS Maintenance Comments field length was increased from 30 characters to 254.</p>
Iweb Core		<p>Reports Module – Patient Detail</p> <p>Added an option for the user to run the Patient Detail report by Ownership and/or Service. Report now displays the vaccinator who administered the patient's vaccinations.</p>
Iweb Core		<p>Settings – Personal – User Preferences – Patient Search</p> <p>Added a setting to allow the user to select a default field to position the cursor in when accessing the Patient Search window. This is useful when using a barcode scanner to allow the cursor to position in the SIIS Patient ID/Barcode field versus the patient first name field (the default).</p>
Iweb Core		<p>Development – Interface update Iweb/MPI</p> <p>Updated the interface within IWeb and the mpi.jar within IWeb_lib to support modifications made to the MPI.</p>

Release Notes (What's New) For
V 3.3
October, 2006 - Registry Products
FINAL

MODULE NAME	HD#	DESCRIPTION
Iweb Core		<p>Architecture Change</p> <p>The conversion from PL/SQL procedures to Java has started. There are approximately 50 procedures converted at this time, the remaining will be complete for the v4.0 release.</p>
Iweb Core		<p>HEDIS Menu - Export</p> <p>The HEDIS export is now including the contraindication information for Varicella.</p>
Iweb Core		<p>Patient Search – Advanced</p> <p>The Advanced Search screen now allows the user to search for records by Guardian First and Last Name. The results will display all records that match this criterion.</p>
Iweb Core		<p>Administration – Associations</p> <p>Created the ability to define Associations using the Administration - Define Values option. The Association field will display on the patient record. This field can be searched on using the Advanced Patient Search method.</p>
Iweb Core		<p>Vaccine Management</p> <p>Corrected problems related to the IRMS/Facility drop-down in Current List/Approve order/Search History page (only visible to Local/State approver).</p> <p>Added two new fields—Physical Inventory and Doses Used Last Month to the Create Order screen. Depending on the IRMS/Facility configuration, these fields can either be manually entered or calculated.</p> <p>VFC Pin will display in all the pages that view or search by IRMS/Facility.</p>
Iweb Core	1	<p>Settings Menu – Forecast</p> <p>Added a Changes Saved message to appear at the top of the window when the SAVE button is pressed.</p>

Release Notes (What's New) For
V 3.3
October, 2006 - Registry Products
FINAL

MODULE NAME	HD#	DESCRIPTION
Iweb Core	4210	<p>Reports Module – Registry Statistics</p> <p>Corrected the Registry Statistics Report to display correctly when the report is scheduled.</p>
Iweb Core	4376	<p>IRMS Maintenance Add</p> <p>Corrected a problem that occurred while adding a new facility when using the new "add facility" functionality from the IRMS Add screen.</p>
Iweb Louisiana		<p>Administration – Property</p> <p>Added an administrative Property to separate the Tdap vaccine on the Patient Record Summary Report and the Universal Certificate reports. Tdap will be on a separate line from the family.</p>
Iweb Louisiana		<p>Administration – Permission to delete administered vaccine</p> <p>Added a new permission which will allow a Registry Client user to edit or delete any administered vaccine in the database, regardless of IRMS ownership.</p> <p>This feature was added for convenience to a Registry Client user in situations where administered shot data needs to be edited/deleted and the IRMS that gave this shot is inactive. This will save the user from having to go to the IRMS manager, activating the IRMS and then selecting the IRMS from the IRMS selection drop down list.</p>
Mass Immunization		<p>Vaccination Add/Edit</p> <p>The users now have the ability to edit the vaccination date on the vaccine entry screen. If the date is changed, this new date will be saved for the duration of the session.</p>
Provider Recruitment Module Maryland		<p>Provider Recruitment Module – Contacts – IRMS Mailing Labels</p> <p>Added a new report to the Contacts Menu to print IRMS mailing labels within the Provider Module.</p>
School Nurse		<p>Reports – Added a new Submission Report</p> <p>Submission Report will list the school name and contact information for schools that have add/updates within 30days, 60days, 90 days, 90+ days categories.</p>
